

Haryana Gramin Udyogik Vikas Yojna (HGUVY)

DRAFT FOR REVIEW | SCHEME | D002

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

HGUVY was Haryana's HEEP 2020 package for new micro enterprises in rural areas of B, C and D category blocks. It combined capital support, term-loan interest assistance and generator-set assistance. Its rural-location test was specific: the site had to fall under the sole jurisdiction of a village panchayat.

A village name in the postal address is not sufficient evidence of that status. The relevant revenue estate, land records and panchayat jurisdiction must match the enterprise's actual site.

Policy period and present-day use

This explanation covers the notification issued under HEEP 2020. Haryana notified its Progressive MSME & Export Promotion Policy on 29 July 2026, expressly superseding HEEP 2020. An older claim and a new investment therefore need separate checks of the transition provisions, relevant dates and operative scheme instructions. The historic benefit below should not be entered as an assured receipt in a new project budget.

How the original package worked

The July 2021 notification provided capital assistance on qualifying plant, machinery and building investment, separate interest support on term borrowing and a generator-set component. Its capital rate was 15%, with different ceilings for general-category and women or SC entrepreneurs. Each component had its own cost and timing basis.

The definition of a new enterprise linked qualifying investment, commercial production or term-loan sanction to the notified period. The unit had to remain in production, and the notification imposed continuing conditions for the assisted investment and generator set.

A particularly important restriction concerned PMEGP: a unit that had received PMEGP subsidy was not entitled to HGUVY benefits other than the specified generator-set component. Do not add the headline benefits from both programmes into one funding plan.

Evidence that makes the assessment useful

Prepare the land or registered lease document, site jurisdiction details, Udyam and HUM records, investment schedule and commercial-production chronology. For interest assistance, add the bank sanction, disbursement and interest-paid evidence. For the generator, preserve the invoice, capacity and installation records.

Assess each component separately before submitting the prescribed online claim. Keep the original claim dates and departmental correspondence if this concerns an existing file. Historic entitlement and a new proposal after the policy transition require different advice.

Is every rural business covered?

No. The original scheme applied to new micro enterprises in the specified block categories and required the other conditions to be met. Rural location alone did not decide eligibility.
