

Generator Set Subsidy Scheme in Haryana

DRAFT FOR REVIEW | SCHEME | D003

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

Haryana's Generator Set Subsidy Scheme was notified for small and medium enterprises in rural C and D category blocks under HEEP 2020. It addressed the cost of a generator for continuity of power. It was a separate programme from [PMEGP](#).

The official definition was not restricted to diesel: it described generator sets using diesel, CNG, petrol or other fuels. The machine's fuel, capacity and operating permissions must therefore be considered alongside its scheme treatment.

Policy period and present-day use

This explanation covers the notification issued under HEEP 2020. Haryana notified its Progressive MSME & Export Promotion Policy on 29 July 2026, expressly superseding HEEP 2020. An older claim and a new investment therefore need separate checks of the transition provisions, relevant dates and operative scheme instructions. The historic benefit below should not be entered as an assured receipt in a new project budget.

The benefit depended on the enterprise and equipment

The June 2021 notification used a per-kVA amount subject to a percentage of the generator cost, with different percentage limits for small and medium enterprises. That structure means the capacity figure and the purchase price both matter. A larger set does not create an unlimited claim.

The unit had to be in a rural area under village-panchayat jurisdiction and in regular production. The generator had to be bought from an authorised dealer or manufacturer within the applicable period and remain intact and operational for five years. The scheme provided for inspections.

Micro enterprises had a separate generator component within [HGUVY](#). Selecting the enterprise classification is therefore necessary before choosing the notification.

Before assessing a purchase

Keep the capacity specification, fuel type, invoice, supplier details, bank payment and installation evidence together. Match the applicant and installation address with Udyam, HUM and land records. Establish the purchase and commercial-production dates and retrieve any earlier application acknowledgement.

The original filing trigger was linked to purchase, with a three-month period in the notification. Current operating permissions for the actual generator are a separate matter: financial assistance does not authorise its use under pollution-control or air-quality restrictions.

Does this page establish that a new diesel generator can receive assistance today?

No. It explains the historic notified scheme. A present purchase needs the operative policy, applicable emissions restrictions and project dates assessed before an incentive is included in the budget.

Official source

Generator Set Subsidy Scheme notification; July 2026 MSME policy.

Discuss the next step

For help assessing the project and preparing the applicable subsidy work, see Subsidy & Incentive Advisory.
