

Haryana Pharmaceutical Capital Subsidy: 2019 Scheme Scope

DRAFT FOR REVIEW | SCHEME | D025

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

Haryana's December 2019 pharmaceutical capital-subsidy notification describes assistance towards eligible plant, machinery and technical civil works, but its location scope needs clarification before a project relies on the benefit.

The important question is which location the notification covers. Its opening and general eligibility provisions refer to new units in the Pharma Park at Karnal, while the capital-subsidy subsection uses wider "throughout the State" wording. That difference needs an authoritative interpretation before a unit outside the park relies on this incentive.

Establish location and policy period

For a project within the identified pharma park, retain the allotment, site and unit records that demonstrate that location. For a project elsewhere in Haryana, obtain the applicable clarification or sanction basis rather than assuming that the wider sentence settles eligibility.

The notification's stated period begins with the Pharmaceutical Policy of 6 March 2019 and runs for five years or until an earlier new policy or amendment. A new pharmaceutical investment should not treat the historic rate as currently available without the relevant continuation or successor instructions.

Costs and operating conditions

The notification's stated capital benefit is 25% of the eligible cost, capped at ₹50 lakh. That historic rate remains subject to the location and policy-period questions above.

The notified assistance concerns plant and machinery and technical civil work. A project cost statement should distinguish those components from land, general construction and working capital. Keep itemised invoices, banking payments and the prescribed certification of expenditure.

The notification requires commercial operation and applicable registrations, land-use permissions and pollution-control approvals. An incentive sanction does not substitute for the approvals needed to manufacture a pharmaceutical product.

Reviewing a historic project

Bring the production date, original application and sanction, site evidence, cost certification and departmental correspondence together. The original claim process links filing to the start of commercial production, so a timeline is essential. It also matters whether the request concerns eligibility, an unpaid sanctioned amount or a rejected claim.

Read the [December 2019 pharmaceutical subsidy notification](#). Rapid can help organise the project and claim evidence and identify the specific scope question that needs resolution before a financial assumption is made.

Discuss the next step

For help assessing the project and preparing the applicable subsidy work, see [Subsidy & Incentive Advisory](#).
