

Haryana Freight Assistance for Exporting MSMEs

DRAFT FOR REVIEW | SCHEME | D032

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

Haryana's July 2023 revised Freight Assistance Scheme addressed part of the domestic freight cost incurred by qualifying manufacturing MSMEs exporting their products. It focuses on movement from the manufacturing location to the specified port, air cargo terminal or international border.

The July 2023 revision made ZED certification part of the assistance structure. An export invoice and a freight bill alone do not establish the amount payable.

Policy period and present-day use

This explanation covers the notification issued under HEEP 2020. Haryana notified its Progressive MSME & Export Promotion Policy on 29 July 2026, expressly superseding HEEP 2020. An older claim and a new investment therefore need separate checks of the transition provisions, relevant dates and operative scheme instructions. The historic benefit below should not be entered as an assured receipt in a new project budget.

How the historic calculation works

The revised notification uses the lower of 1% of the export's FOB value or actual eligible freight, excluding the specified taxes and charges. Block location and thrust-sector treatment then affect the ceiling. ZED certification level affects the proportion of assistance available.

Each of those stages must be retained in the working. Applying a percentage to total export sales can overstate the claim if the eligible freight is lower, the shipment costs include excluded amounts or the annual ceiling has already been reached.

Connect manufacture, shipment and payment

Prepare a shipment schedule linking the goods manufactured by the unit, export invoice, shipping bill, FOB value and domestic transport invoice. Add payment evidence and the relevant export realisation documents. The records should distinguish the domestic eligible leg from international transport and other logistics services.

Keep the Udyam registration, ZED certificate and validity, factory location and block category with the claim. The revised notification also addresses enterprises under common management, so a multi-unit group needs to assess its claim boundary before multiplying unit-level ceilings.

Use the revision that governs the period

The July 2023 scheme states an effective date of 1 July 2023. Earlier exports, later claims and investments affected by the 2026 policy transition need their own date assessment. Keep earlier sanctions and claim histories available when establishing the remaining entitlement.
