

Haryana Patent Registration Assistance

DRAFT FOR REVIEW | SCHEME | D046

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

Haryana's June 2021 Patent Registration Scheme provided reimbursement of qualifying patent-registration expenditure incurred by eligible MSMEs. It supports the cost of protecting an invention; it does not determine whether the invention is patentable or guarantee that a patent application will succeed.

The June 2021 notification covers domestic and international patent registration. This directory entry is sometimes encountered under the older label "Patent Free". The official scheme is Patent Registration Assistance.

Policy period and present-day use

This explanation covers the notification issued under HEEP 2020. Haryana notified its Progressive MSME & Export Promotion Policy on 29 July 2026, expressly superseding HEEP 2020. An older claim and a new investment therefore need separate checks of the transition provisions, relevant dates and operative scheme instructions. The historic benefit below should not be entered as an assured receipt in a new project budget.

What the notification supports

The scheme provides reimbursement of 100% of eligible actual expenditure, subject to a ceiling of ₹25 lakh. The claim remains tied to the eligible patent and notified costs. A general research budget, product-development cost or every professional invoice should not be included without checking its admissibility.

Registration is a material event in the notified process. Filing an application, receiving an examination report and obtaining registration are different stages. Preserve the dates and evidence of each rather than treating an application receipt as proof of a registered patent.

Build a patent-specific expense record

Keep the patent application and registration particulars, ownership documents, fee receipts, professional invoices and payments. For international expenditure, preserve the relevant currency and payment evidence. The applicant entity, patent owner and operating unit should be reconciled wherever names or group structures differ.

The unit's registration, production and eligibility records also form part of the assessment. The historic notification prescribes a short claim period linked to registration, so the filing date must be checked early when reviewing an older patent.

Read the [Patent Registration Scheme](#) and [2026 successor policy](#). The separately documented [EV patent incentive](#) has its own policy basis. A patent should not be costed under both routes without examining the applicable overlap conditions.

Discuss the next step

For help assessing the project and preparing the applicable subsidy work, see [Subsidy & Incentive Advisory](#).
