

R&D Incentives in Haryana's EV Sector

DRAFT FOR REVIEW | SCHEME | D051

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

Haryana's EV policy provides research-and-development support for specified electric-mobility technology work. It distinguishes new charging technology, new EV technology, research into non-fossil-fuel mobility and R&D infrastructure at eligible educational institutions.

The purpose is a research outcome. Buying standard production machinery or opening an ordinary workshop is not, by itself, evidence of a qualifying R&D project.

The applicant and research question matter

The policy describes support for educational or research institutions and selected research centres, with category-specific assistance and limits on the number of proposals. A general "EV innovation" label is insufficient to determine the right category or amount.

A proposal should state the technological problem, existing knowledge, intended improvement, research method and what evidence will demonstrate success. Distinguish a laboratory experiment from a prototype, field trial or commercial production facility.

Prepare the project for technical assessment

Record the institution's constitution, research team, site and facilities, collaboration arrangements, intellectual-property position and proposed budget. Break the work into milestones with measurable outputs. Identify which equipment and personnel costs belong to the research and disclose other public funding.

The relevant implementing scheme and selection instructions should determine the application route, cost treatment and disbursement conditions. Preserve the technical proposal as approved and obtain any required consent before changing the scope. Successful expenditure alone does not prove that the promised research milestone was delivered.

Is a Centre of Excellence automatically an R&D project?

No. A [Centre of Excellence](#) may primarily serve skills and training. The actual research objective and applicable category need to be established independently.

Does a private manufacturer qualify on the same terms as a college?

The policy differentiates applicant and activity categories. Use the correct implementing provision rather than assuming one institution's benefit applies to another.

Policy source and application status

The [notified Haryana Electric Vehicle Policy, 2022](#) establishes this assistance category. Its stated five-year period and the existence of a policy provision do not establish that a particular application slot remains available. Check the operative scheme notification, amendments and departmental application instructions before committing expenditure on the expectation of support.

Discuss the next step

For help assessing the project and preparing the applicable subsidy work, see [Subsidy & Incentive Advisory](#).
