

Warehousing Capital Subsidy in Haryana

DRAFT FOR REVIEW | SCHEME | D017

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

Haryana's warehouse capital assistance was notified under the Logistics, Warehousing & Retail Policy, 2019. It addressed qualifying fixed investment in warehousing projects in C and D blocks. It is a separate state-policy benefit from [AIF loan interest support](#) and [AMI agricultural marketing assistance](#).

The 2019 scheme had a five-year operating provision unless superseded. This page explains that notified framework for readers assessing an older investment or claim. Fresh entitlement, any extension and later-policy treatment must be established before it is relied on for a new project.

A warehouse is not automatically a logistics park

The notification defined warehouses, logistics parks and integrated or multi-modal logistics parks separately. Each has its own facility requirements. A standalone storage building should not be assigned a logistics-park ceiling simply because vehicles use the site.

For warehouses, the capital-assistance provision was 25% of eligible fixed capital investment, capped at ₹5 crore. Separate ceilings applied to logistics parks and multi-modal parks. The warehouse provision required the relevant C or D block location and continuing commercial operation for ten years; failure to meet that continuing condition could lead to recovery.

What the capital calculation included

The notified eligible base concerned new building, machinery and equipment investment made before commencement of commercial operations. Land cost should not be folded into that base merely because the accountant's overall fixed-asset schedule includes it.

The source also prescribed facility and access requirements and an additional-investment test for existing enterprises. Those historic scheme definitions should be checked alongside the current land and building rules for the particular site. A subsidy application does not replace development permission.

Build a project-specific claim file

Start with the storage use, site plan, land documents, permitted activity, facility capacity and actual commencement date. Add the certified fixed-investment schedule, itemised building and equipment details, invoices, payment evidence and audited accounts where relevant. An existing enterprise should show its original investment and expansion separately.

The capital provision called for a claim within three months of commencement of commercial services, operations or production. For a legacy file, preserve that first submission and subsequent departmental orders. An operating warehouse with no timely claim is a different case from an already sanctioned project awaiting release.

Does every grain godown qualify for all three warehouse schemes?

No. Haryana capital support, AMI and AIF use different cost bases, financing structures and activity conditions. Compare each against the actual facility and check any restrictions on combined support.
