

Patent Fee Reimbursement under Haryana's EV Policy

DRAFT FOR REVIEW | SCHEME | D045

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

Haryana's EV policy includes reimbursement for qualifying patent-registration expenditure by eligible manufacturing units. The benefit concerns the patent and its permitted costs. It does not give a business ownership of an invention or remove the need to establish the correct applicant and patent rights.

This entry covers the EV-policy provision. The [general Haryana Patent Registration Scheme](#) has a different policy basis even though the benefit descriptions may look similar.

Identify the patent and the claimant

The policy describes support for domestic and international patent registrations and lists expenditure such as filing, consultancy, search, maintenance and publication fees, subject to a ceiling. The operative scheme must be checked for the treatment and timing of each cost.

Prepare a schedule linking the patent application or registration number, jurisdiction, invention, applicant and the eligible manufacturing unit. If rights sit with a founder, group company or research partner, resolve the ownership and claim relationship before presenting those costs as the unit's expenditure.

Preserve the full expense trail

Keep patent-office acknowledgements and registration documents, professional invoices, official fee receipts, payment evidence and relevant assignments or licences. Separate domestic and overseas costs and identify any other assistance already claimed.

A patent application, examination and registration are different stages. The applicable scheme determines which stage triggers eligibility and filing. Confirm that trigger and the prescribed departmental route instead of assuming that the first legal invoice starts or completes a claim.

Can the same patent expenditure receive both state benefits?

The EV policy restricts similar incentives under other Haryana policies. A cost should be mapped to its chosen assistance head before any claim is filed.

Policy source and application status

The [notified Haryana Electric Vehicle Policy, 2022](#) establishes this assistance category. Its stated five-year period and the existence of a policy provision do not establish that a particular application slot remains available. Check the operative scheme notification, amendments and departmental application instructions before committing expenditure on the expectation of support.

Discuss the next step

For help assessing the project and preparing the applicable subsidy work, see [Subsidy & Incentive Advisory](#).
