

Haryana Cluster Plug and Play Scheme

DRAFT FOR REVIEW | SCHEME | D047

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

Haryana's Cluster Plug and Play Scheme was designed to create affordable operating facilities and shared infrastructure for MSMEs. The implementing agency develops the facility and takes responsibility for its common assets. Businesses occupying the premises have their own operating and investment requirements.

The December 2020 notification sits under the MSME Policy 2019. Later extension orders and Haryana's July 2026 successor policy must be considered when establishing the applicable period for a project. The old programme name alone does not confirm that a new proposal is open for submission.

A developer-led operating facility

The scheme's implementing-agency routes include specified private entities and organisations. The original conditions require at least 10 leasable or saleable plots or operating facilities, with a prescribed reservation for startups and women or SC/ST-owned enterprises.

Land must be arranged through ownership or a qualifying long lease. The original notification also requires minimum own contribution and term lending, each at 20% of project cost. These are financing conditions for the implementing agency, not contributions collected automatically from future occupiers.

Common assets create continuing responsibilities

The project can involve enabling infrastructure and capital-intensive common services such as treatment facilities. The implementing agency is responsible for permissions, financial closure, execution, operation and maintenance. The notification requires transparent publication of specified charges and rates.

A proposal should therefore explain how the infrastructure will be used and paid for over time. Identify the expected occupiers, shared services, maintenance costs and the person or organisation accountable for each service.

Prepare the project for assessment

Bring land and tenure documents, layout, proposed unit mix, common-facility design, infrastructure estimates and the funding plan. The appraisal needs to distinguish developer-owned assets, plots or premises offered to MSMEs and investment made by those MSMEs themselves.

For a project already approved, retain the sanction, expenditure, progress reports, occupancy arrangements and permissions. Any later claim should reconcile the completed facility with the approved scope and the applicable extension or transition orders.
