

Haryana Textile Skill Training Centre Support

DRAFT FOR REVIEW | SCHEME | D055

Designated reviewer: Atul Goyal. Review pending. PDF prepared 15 September 2026 from the current repository manuscript. This drafting date is not a verified review, approval or source-verification date.

The textile Skill Training Scheme supports the creation of common training facilities. It is relevant to an organisation establishing a centre that can build skills for the textile industry, rather than an employee seeking a personal training payment.

The July 2023 notification defines the implementing agency and eligible project cost. It sits within the textile policy, whose schemes were extended to 18 December 2026. A proposed centre must still meet the scheme's organisational, location and approval conditions.

Who develops the centre?

The notification identifies routes for groups of textile MSMEs through an SPV and for specified associations, skill bodies, government bodies and other qualifying organisations. For the MSME group route, it requires at least five participating units. The applicant's legal form and membership should be settled before the centre is presented as an eligible project.

The practical starting point is employer demand. Identify the processes taught, the skills employers need, the proposed intake and the equipment required. A training plan should distinguish classroom space from machines, tools and other eligible training infrastructure.

What can the assistance cover?

The notified support is 50% of eligible project cost, with ceilings linked to location: ₹2 crore in B blocks, ₹5 crore in C blocks and ₹10 crore in D blocks. Land and building costs are excluded from this assistance.

The centre therefore needs a complete funding plan even where equipment support appears substantial. Premises, working capital, trainers and continuing operations must be funded on their own terms. The grant should be calculated from approved eligible components, not the total cost of establishing the organisation.

Prepare for operation as well as sanction

A proposal should include the implementing agency's constitution, participating employers, site documents, curriculum, equipment specifications, quotations and financing. Explain trainer availability, assessment arrangements and how the centre will recruit learners and meet employer demand.

The centre's operating plan should identify who maintains the equipment, pays staff and utilities, and tracks training outcomes. Keep procurement, payment and utilisation records so the approved facility can be verified through implementation and claim stages.
